DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-20 and 23-26, drawn to methods/apparatus for evaporating a liquid sample including a transducer.

Group II, claim(s) 21-22, drawn to an apparatus.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: a method or apparatus for evaporating a liquid sample contained in a sample holder including mounting a transducer to monitor the force acting on the sample holder relative to the rotor when rotating at a given speed and obtaining a force signal...and programming a computer to compute a weight value is not the same or does not correspond to an apparatus comprising a vacuum chamber, a rotor, a drive means, at least two sample holders and a bearing raceway incorporating a plurality of ball bearings .

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
